Past: 25 Activities](#)

Some Archaeology Activities:

- * Bury some objects in the dirt. Then have your child find them with a shovel, paint brush, or strainer. You can even section off areas like archaeologists do. Discuss the object with your child and what its purpose is.
- * Check out a museum with your child (history or art) and look at the different things that were made by the different types of people.

Archaeology Song:

The Reason We Dig
("Row, Row, Row Your Boat")

**Dig, dig, dig in the dirt,
Looking for artifacts.
Archaeology is so fun,
You can learn lots of facts.**

**Mummies, mosaics, and pieces of urns,
From people long ago.
This is the reason why we dig,
About their lives we know.**
